A pharmaceutical industry whistleblower has spoken out to allege that a world-renowned professor, Dr. Francis Boyle, was murdered shortly before he was due to testify before a Dutch court that Covid mRNA "vaccines" were developed as deadly "bioweapons."

As Slay News previously reported, Boyle, a bioweapons expert, wrote the 1989 Biological Weapons Anti-Terrorism Act, which was passed by Congress and signed into U.S. law in 1990 by President H. W. Bush.

Boyle, who was one of the most prominent law professors in the world, declared last year that "everyone involved" in pushing Covid mRNA shots onto the public committed "crimes against humanity."

During an interview last summer, Dr. Boyle asserted that the "frankenshots" were part of a plan to conduct "medical experimentation" on humanity.

He warned the public that COVID-19 was developed in a lab as "an offensive biological weapon."

Professor Boyle argued that those who pushed the mRNA injections "clearly violated the Nuremberg Code."

Speaking during an interview with reporter Maria Zeee, Boyle declared that vax pushers are guilty of "murder" for causing deaths through "vaccine" injuries.

"Everyone involved in the development of COVID-19 as an offensive biological warfare weapon and also everyone involved in the manufacture of these COVID-19 'frankenshots' clearly violated the Nuremberg Code on medical experimentation," Boyle said.

"It was a Nuremberg crime and a crime against humanity."

Boyle died unexpectedly in Urbana, Illinois, on January 30, 2025, at the age of 74.

His cause of death was never disclosed.

Now, a whistleblower has alleged that Boyle was murdered to prevent him from testifying on Covid "vaccines" in the Netherlands.

According to Infowars founder Alex Jones, Boyle "magically died" before he could expose evidence proving the mRNA injections were developed as bioweapons.

Jones revealed that a retired pharmaceutical company executive has disclosed that investigations are still ongoing into the "suspicious" circumstances surrounding Boyle's death.

Boyle was reportedly planning to produce evidence in a Dutch court during a civil trial against Microsoft co-founder Bill Gates and several other powerful globalists.

As Slay News has reported, Gates is being sued over his role in promoting the "vaccines" that led to surging deaths and injuries.

During a recent interview with journalist Liz Gunn and UK politician Jim Ferguson, retired pharma R&D executive Sasha Latypova raised fresh alarm over the sudden and "suspicious" death of Dr. Boyle.

She noted that he died suddenly just after he had committed to testify in court that the Covid injections are bioweapons.

Latypova stressed the significance of Boyle's involvement, noting that he was among the few legal authorities in the world with the irrefutable expertise to classify the injections as biological weapons.

The Dutch case in question began nearly two years ago and centers on seven victims, including one who has already died from Covid shot injuries.

According to Latypova, the lawsuit names former Dutch Prime Minister (now NATO chief) Mark Rutte, WEF founder Klaus Schwab, Bill Gates, and Pfizer CEO Albert Bourla as defendants.

It accused them of coordinating a "militarized campaign of democide" through lies and coercion that resulted in widespread injuries and deaths.

Adding further controversy, one of the plaintiffs' attorneys, Arno van Kessel, was arrested in June 2025.

Police accused him of being tied to a "criminal organization" and claimed they found explosives at his home.

But as Dutch outlet De Andere Krant later reported, the so-called explosives turned out to be nothing more than a stash of old fireworks, casting serious doubt on the motives behind his detention.

“Now, there was a sixth witness, Professor Francis Boyle, who is actually an expert on bioweapons, having drafted several bioweapons conventions-related laws in the US, and three weeks after he agreed to testify on behalf of the plaintiffs that these products, and the process was, deployment of bioweapons, he suddenly died,” Latypova said.

“And, we still don’t know the cause of death.

“The only thing that we know is he was perfectly healthy prior, and was teaching full-time.

“He was in his mid-70s,” she noted.

“This was a shock to all of us.

“This looks **very suspicious** to me.”

“This is how serious it is,” she added.

Whistleblower: Top Doctor Was Murdered Before Testifying That Covid 'Vaccines' Are '…

The public was promised that Covid mRNA shots would protect against the virus.

However, mounting evidence now suggests the opposite.

The news comes after scientists issued an alarming warning to the public last month that the "toxic synergy" of mRNA "vaccines" and COVID-19 is serving as "dual bioweapons" to wipe out humanity with surging chronic disease and global sudden deaths.

In a chilling new manuscript, scientists assert the visus and "vaccines" have been working against humanity by fueling an unprecedented global health crisis.

Meanwhile, the World Council for Health (WCH) has just made an explosive and historic move by officially declaring that Covid mRNA "vaccines" are "biological and technological weapons of mass destruction."

The bombshell declaration was announced by the global health organization's Florida wing.

In a stunning announcement, the World Council for Health Florida (WCH FL) confirmed it is formally endorsing the "Sansone mRNA Bioweapons Prohibition Act."

As Slay News has previously reported, the first-of-its-kind bill seeks to criminalize and outlaw the use of mRNA technology under existing state bioweapons laws.
